PIKE TECHNOLOGIES HEADQUARTERS HONORED WITH BEST OF 2008 AWARD

Madison, Wis. — **Eppstein Uhen Architects** and **Tri-North Builders** were recognized for an extraordinary design and a unique construction solution in creating **PIKE Technologies'** new world headquarters in Madison, Wis. McGraw-Hill Construction's *Midwest Construction* honored the building team with an Award of Merit in the Industrial/Manufacturing category. The project was selected by a jury of prominent industry professionals and awarded in Chicago at a ceremony held on December 2.

The distinctive design evolved from a challenging site, but maximizes the features of an imposing municipal storm water pond and a steep slope to accomplish the owner's goals. PIKE Technologies builds complex spectroscopic accessories. PIKE appreciated that the design was unique and very functional, but also represented the precision and craftsmanship demonstrated by their products. The 40,000-square-foot building stands out with the best projects in Illinois, Indiana, Wisconsin and Eastern Missouri.

###

Eppstein Uhen Architects is a 101-year-old, full-service design firm best known for pairing inspired design with exceptional client service. More than 110 employees in Milwaukee and Madison are challenged to go beyond design by demonstrating unparalleled commitment to the markets they serve, the community, and their clients. The award-winning firm specializes in several distinct markets: corporate office, educational, retail/mixed-use, senior living, healthcare, residential, public, industrial, master planning, and interior design.
